

# AvePoint® Cloud Backup

## UNMATCHED MICROSOFT 365 DATA PROTECTION

Easy to use, complete backup and flexible restore SaaS  
for all **Microsoft 365 instances**.

**AvePoint Cloud Backup** helps businesses relying on Microsoft 365 bounce back from service outages, ransomware attacks and user errors. It is the most complete Cloud-to-Cloud Backup solution.

**Enhance Microsoft 365 protection** for all your business content, with multiple daily backups and flexible restore. With Intcomex Cloud, you can deliver it all.

### **Comprehensive Backup**

Unlimited backup service for SharePoint Online, Exchange Online, Project Online, OneDrive for Business, Groups, Teams, Planner and Public Folders.

### **Recover in Minutes, not Days**

Easily restore your Microsoft 365 artifacts for sites, libraries, OneDrive, mailboxes, Groups or Teams.

### **Worry-free Backup**

Automatic backups up to four times a day. 100% of your data retained for one year. Unlimited backup subscriptions give you flexibility and protection all in one.

### **Backup on your terms**

**You choose!** Securely store your Microsoft 365 backup data in our scalable Azure Storage, your private cloud or in a data center with any vendor.

**Protect Microsoft 365 content**, no matter where it lives. All your critical cloud services protected with up to 4 backups a day, every day. Content stored in AvePoint's unlimited 256-bit encrypted storage or in your storage of choice. **And best of all, extensive coverage and restore options.**

## EXPERIMENT THE BEST COVERAGE FOR ALL MICROSOFT 365 CLOUD CONTENT

### Granular restore

For mail, files, and collaboration. On-demand, ensures the most authoritative copy is recovered.

### Out-of-place restore

Restore content out of place, to another cloud site, mailbox, OneDrive, or Group.

### Security rollback

Perform full security rollbacks to undo Microsoft 365 permissions changes.

### End user restore

AvePoint's Chat Bot (AVA) allows users to perform restores from Microsoft Teams while keeping security in mind.

### Object-based restore

Directly locate Microsoft 365 Teams, files, emails, or other objects with full-text search for rapid discovery and recovery.

### Delegated restore

Delegate restores to trusted users based on roles. Security trim by AD properties, such as location, department or role.

### Offline restore

Restore .ZIP and PST files to local storage for any time access. Export OneDrive, SharePoint, and Outlook data, including files, mailboxes, or mail items such as chat histories.

### Point-in-time restore

Recover content to a specific point in time using a simple calendar based interface.

## PROTECT ALL MICROSOFT 365 INSTANCES

### Exchange Online

Backup Outlook mailboxes, Archives, folders, chats, calendars, contacts, messages.

### SharePoint Online

Protect site collections or granular sites, lists, libraries, folders, items, metadata, security settings, and version history.

### Microsoft 365 Groups

Backup Microsoft 365 Groups, including files, conversations, notebooks, sites, and more.

### Microsoft Teams

Teams channels, private channels, conversations, work files, meeting items, and more can be recovered with ease.

### OneDrive for Business

Backup OneDrive for Business lists, libraries, folders, items, metadata, security settings, and version history.

### Public Folders

Mailboxes, messages, files, contacts, forms, and postings, all protected.

### Project Online

Protect Project Online plans, jobs, tasks, and files.

### Planner

Backup Planner tasks, buckets, progress, labels, and assignments are kept safe for anytime access.

## COMPLIANCE IN ACTION MICROSOFT 365

### Backup data sovereignty

Multi-geo support and granular storage control keeps your backup data storage and processing where you need it. Choose built-in Azure storage or BYOS by organization, entity, or even department! Mix and match for complex data sovereignty requirements.

### Data security with delegated administration

Control access to view and manage backups and restores. Security trimming based on AD properties, manual configuration, or Microsoft 365 permissions enables role-based access.

### Right to be forgotten

Search across user Exchange mailboxes as well as OneDrives. Remove users' data from your backups.

### DSAR processing

Export all the latest information in a given user's OneDrive or Mailbox to comply with EU GDPR Article 15.

### Admin Auditing

In addition to auditing restore operations, track administrative activity, including who made changes or downloaded a report.

### Preserve accountability

Record the consent to purge and delete data for accountability, plus create a trail of evidence for the Defensible Deletion of the content.

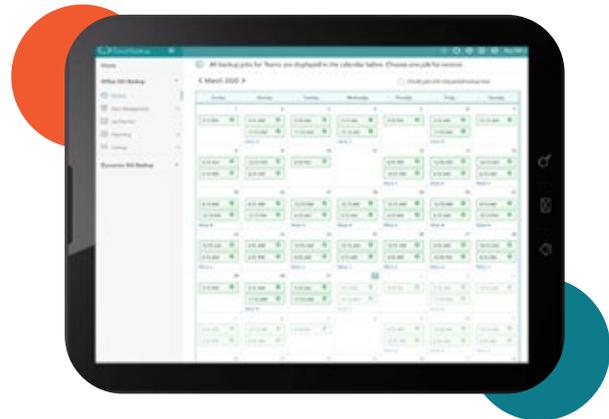

### Status monitoring

Monitor and produce reports of your protection status across Microsoft 365 Exchange mailboxes, calendars, Groups, Teams, SharePoint, and more.

### Granular content deletion

Search for and delete content from Microsoft 365 backups across the whole organization. Security trimmed, role-based access prevents unauthorized deletions.

With **Intcomex Cloud**, help your clients enjoy worry-free **Microsoft protection. AvePoint Cloud Backup**, the industry's most complete cloud-to-cloud backup solution for Microsoft 365, delivers unlimited cloud backup and restore, guaranteeing business continuity and data protection.
