

IsMyConnect SIP, provides you with a complete telephony service on your SIP endpoints, and extensive online telephone traffic reports as well. You can reuse your SIP devices (Hardware or Software). We also offer you our Addon IsMyPeers as a SIP Softphone.

BENEFITS.

MOBILITY

Enjoy anywhere integrated telephony over your SIP endpoints.

BUSINESS INTELLIGENCE

Check online reports and get detailed real-time service metrics.

FULL SERVICE

Hosted PBX solution with all the required functionalities.

IsMyConnect SIP is an all-inclusive service.

The service includes:

- Full Featured Cloud Switch.
- Complete reports online in real time for incoming and outgoing calls.
- Extension number.
- Customer-owned SIP phones are configured through a remote session.
- Service activation, 3 hours online training and remote support.

To achieve interconnection to the Public Telephone Network, you select any of the following Addons:

- DID's offered at the Intcomex Market Place.
- PBX Connect: Interconnection service from your current switch to the Public Telephone Network.

In case of selecting Addon for Interconnection to the Public Telephone Network through DID, it is required to acquire **Air-time Addons** according to your preference.

The Airtime Addons allow you to acquire prepaid minutes that you consume in a certain period of interest. The Airtime does not expire, and you can define a threshold value, after which our system will notify you that you have a low balance. Airtime is available in the following options in US dollars (\$ USD): **TiempoAire 100, TiempoAire 500 and TiempoAire 1000.**

To enjoy IsMyConnect SIP you can do it from your current SIP phone devices, **or via software-based SIP phone.**

In case you do not have SIP Devices, we also offer you the **IsMyPeers** add-on. Which offers you a SIP phone via Software with all the required functionalities.
