

THE FUTURE IS HERE, TIME TO EMBRACE IT

Data Migration and Modernization to Azure

We all know what tends to happen to those who refuse to evolve...

The era of innovation is here, and it comes with unlimited possibilities for both, you -as an IT service provider- and for your clients; but it waits for no one.

The time for businesses to migrate their current environments to Azure's much more powerful, secure, and easy to manage cloud platform, is now.

You have the need, we give you the solutions...

Identify your business' needs, to offer you exactly the solutions you require. We've got you covered.

Control your monthly revenue through a consumption-based business model on Azure.

Evolve to achieve business productivity levels you never thought possible before.

Why the Azure cloud?

- Plan, provision, manage computing and data capabilities with ease
- Enjoy increased availability, disaster recovery, backup and storage
- Excel Performance
- Scale services up or down as needed
- Improve security and regulatory compliance
- Control budgeting and cost estimation
- Deploy and monitor infrastructure and applications more efficiently

Migration and modernization scenarios

Windows Server on Azure

On January 2020, Microsoft ended the support for Windows Server 2008 and 2008 R2, and without regular security updates, your infrastructures and applications become increasingly susceptible to attack.

Migrate to Azure with free security updates

- Get three years of extended security updates for Windows 2008 and 2008 R2 at no additional cost. Your data will be secure while you make the move to a current version
- Use existing licenses and save up to 80% on Azure Virtual Machines with Azure Hybrid Benefit and Reserved Instances

Upgrade on-promises and stay protected

- Upgrade to Windows Server 2019 for greater innovation, built-in security, and container support
- For continued protection beyond the deadline, buy up to three years of extended security updates, covering only the servers you need while you upgrade.

Business innovation with fully managed services like Azure SQL Database, Azure App Service, and Azure IaaS.

Reduced infrastructure costs. Azure Hybrid Benefit, optimized infrastructure, and free security updates for up to three years after end of support

Windows Server on Azure counters sophisticated cyberthreats and complies with most certifications of any cloud provider

Data modernization to Azure

Modernize your data strategy by moving databases to the cloud. 21st century businesses demand better, faster, cheaper means of leveraging actionable information.

Migrate to the Cloud with Azure SQL Database

- Seamless and compatible. The broadest SQL Server compatibility and VNET support
- Competitive TCO. Up to 80% savings with Azure Hybrid Benefit and reserved capability
- Breakthrough productivity and performance. Up to 100 TB of on-demand, scalable storage per database
- Industry-leading security. Layers of security and 99.9% availability SLA
- Built-in intelligence. Intelligent performance tuning and intelligent protection

Set up and manage your SQL Server deployments in minutes, scale up or down as needed.

Protect all your data estate with the most secure database on the most compliant cloud

Meet your toughest demands with virtual machines optimized by the team that built SQL Server

Get the most out of your on-premise investments, take advantage of Azure's rich ecosystem
